## **DETAILED ACTION**

### ***Response to Arguments***

Applicant's arguments, see pages 5-8, filed October 18, 2006, with respect to claims 1-3, 10-14, and 16-21 have been fully considered and are persuasive. The rejection of the above claims has been withdrawn.

Applicant's request for reconsideration of the finality of the rejection of the last Office action is persuasive and, therefore, the finality of that action is withdrawn.

### ***Allowable Subject Matter***

Claims 1-3, 10-14, and 16-21 are allowed.

The following is an examiner's statement of reasons for allowance:

Regarding claim 1, examiner concludes after applicants' convincing arguments, submitted both in formal arguments on October 18, 2006 and in telephonic interview on November 2, 2006, that the previously applied prior art references, US 6,765,715 to DiJaili et al. and US 2001/0015842, even if taken in combination, fail to teach that the optical output signal is narrower than the optical input signal and that one of the first and second inputs includes an optical delay line. Examiner also concludes that the application of the previously applied prior art references was made using reconstructive hindsight of the applicant's disclosure. Therefore, examiner concludes that the prior art, as exemplified by DiJaili and Patel, fails to disclose or render obvious the limitations of the narrowed output and the proper placement of the optical delay line.

Claims 2, 3, 10-14, and 16-21 depend from allowed claim 1.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
